Phone: +91 9549409013

Email: saurav26dangi@gmail.com

Location: Delhi, India

LinkedIn: [Saurav Dangi](#)

RESEARCH INTERESTS

- AI-Based Intelligent Visual Inspection & Semiconductor Defect Detection
- Lightweight Deep Learning, Edge AI & TinyML for Industrial Applications
- Anomaly Detection & Predictive Maintenance in Smart Manufacturing
- Multimodal AI, Federated Learning & Explainable AI for Intelligent Manufacturing

EDUCATION

Bachelor of Computer Applications

Sep.'22 – Jul.'25

Guru Gobind Singh Indraprastha University, India (*National Institutional Ranking Framework: 93rd*)

CGPA: 8.34

Relevant Coursework: Artificial Intelligence, Machine Learning with Python, Deep Learning with Python, Cloud Computing, Internet of Things, Data Warehousing & Data Mining, Computer Networks, Software Engineering, Java Programming

PROJECTS

Driver Drowsiness Detection System

Nov.'24

- **Developed a real-time driver-monitoring system** using Python, OpenCV, TensorFlow and a CNN model to identify visual indicators associated with driver drowsiness.
- **Implemented facial-landmark and eye-movement analysis**, achieving approximately **87.5% CNN classification accuracy** during project testing.
- **Integrated image preprocessing, facial-feature extraction and CNN-based inference** into a continuous monitoring pipeline, achieving approximately **12–18 FPS** during real-time operation.
- **Implemented automated drowsiness alerts** based on detected fatigue indicators, demonstrating the practical application of deep learning and computer vision for continuous driver-safety monitoring.

Real-Time Automated Entry System

Sep.'23

- **Developed an automated access-control system** integrating RFID authentication, facial recognition, Python, OpenCV and IoT for secure and automated entry to restricted areas.
- **Implemented a two-stage authentication workflow** combining RFID identification with facial-recognition verification, achieving approximately **80% facial-recognition accuracy** during project testing.
- **Built a real-time OpenCV-based facial-recognition pipeline** for face detection and verification and integrated recognition outputs with an IoT-controlled access mechanism.
- **Reduced manual access-verification requirements by approximately 50%**, demonstrating the potential of biometric authentication and IoT automation for intelligent access-control systems.

PROFESSIONAL EXPERIENCE

Java Developer Intern

Jun.'24

Techno Hacks Solutions Pvt. Ltd., Nashik, India

- **Built and tested functional Java applications and problem-solving modules**, applying debugging and structured programming techniques to improve code reliability and achieve successful execution across assigned tasks.
- **Gained hands-on exposure to software-development workflows and Java application development**, including IDE-based development, testing and implementation of programming solutions in a project-oriented internship environment.

TECHNICAL SKILLS

1. **Programming & AI/ML:** Python, Java, C++; Scikit-learn; TensorFlow; Convolutional Neural Networks (CNN); Deep Learning; Machine Learning
2. **Computer Vision & Intelligent Systems:** OpenCV; Image Processing; Facial Recognition; Facial Landmark Analysis; Object Detection; Image Classification; Anomaly Detection; Real-Time AI Monitoring
3. **AIoT & Edge Intelligence:** RFID Integration; IoT-Based System Integration; Intelligent Vision Systems; Edge AI; Real-Time Intelligent Systems
4. **Web & Databases:** React.js; Node.js; MySQL; MongoDB
5. **Cloud, Development & Infrastructure:** AWS; Docker; Kubernetes; Git; CI/CD; VS Code; Eclipse
